Kivo Tandem Bike

The Kivo is a child-parent tandem with the adult sitting behind and the child sitting in front. The child can get a good view of the environment whilst the rider sitting behind can always keep a good watch on the child. The Kivo has a low step through and therefore is easier to use

Benefits

- Good view for both the adult and the child
- You can choose if the child has to pedal or not
- The hind person steers
- For both persons a low step through
- Available on the Cycle Scheme

OPair Disability Bike

The OPair is an electric wheelchair bike with which you can transport a wheelchair user. A seat for the wheelchair user/passenger is affixed to the front of the bike. From the back, the cyclist has an overview on the road and view on the passenger. On the split frame version, the front part is easy to remove from the cycling component, which enables use as a wheelchair on location

Benefits

- Transport someone who is in wheelchair
- Adjustable seat
- Suitable for children and adults
- Fits through a normal door
- Good view for the passenger as the driver
- Front part is detachable
- Front part can be used as a wheelchair

Van Raam Easy Rider Tricycle

The Easy Rider tricycle for adults is clearly different from other tricycles. It has a unique frame with low step through and a stable lower sitting position. The low centre of gravity, seating with a back support and steering in front give the rider a safe and secure feeling. The seat height and seat angle are adjustable. The forward pedalling motion and the frame suspension ensure a perfectly comfortable ride

Benefits

- Comfortable sitting with backrest
- Very good riding characteristics due to the low centre of gravity
- Comfortable and smooth-running
- Perfect driving comfort
- Forward pedaling motion for more comfort
- Very stable for a safe and secure feeling

Tomcat Thunderbolt

The Tomcat Thunderbolt is a safe, stable and easy to use hand-propelled tricycle for teenagers and adults. Adapted for multi-user use from the popular Tomcat Dragon concept easily adapts to every user's setup requirements. Its comfortable bucket seat with recoil safety straps slides smoothly and easily to the most comfortable and effective handcycling position whilst strapped footrests adjust in seconds for leg stretch, platform height and rotation.

Benefits

- Suitable for 14 years and older.
- Robust, tough and stable frame
- Very low step-through frame design
- Shimano 8 speed, Hand cranked, hub design
- "Self-Centring" steering for a stable, responsive ride
- Bucket seat with 20cm slide adjustment
- Seat and footrests adjust in seconds with rider seated

Petra Race Runner

The PETRA RaceRunner rolls so freely that even children and adults who have been restricted to power wheelchairs have found now a way of propelling themselves by their own efforts. It is fun and stimulating regardless if you are a child, teenager, or senior. Whether you search for recreational leisure, physical challenge, or just equipment that gets you from point A to B, the PETRA RaceRunner does the trick

Benefits

- Low centre of gravity
- Good stability
- Saddle unit counteracts lateral sway
- Can be used as a seat when resting

Tandem Bike

Tandem bikes offer benefits like faster speeds due to their aerodynamic efficiency and doubled pedalling power, increased stability, and a fun way to bond and communicate. They are particularly useful for riders with different fitness levels or abilities, enabling them to ride together at a steady pace, and provide an inclusive way for people with disabilities to enjoy cycling.

Benefits

- Hands-free tasks for the stoker
- Enhanced teamwork
- Greater stability
- Less effort on climbs

VeloPlus Wheelchair Bike

The VeloPlus wheelchair transport bike is designed for transporting people, who can remain seated in their own wheelchair, by cycle. The passenger is not required to be transferred between the wheelchair and the cycle. VeloPlus lets the co-rider to be wheeled on to the plateau of the cycle easily without having to be lifted

Benefits

- Smooth running
- Accommodates almost any wheelchair
- Easy to use
- Comfortable
- Safe
- Good contact with passenger

Companion Bike

The rider has full control of the bike and the passenger has the option of pedalling. This makes this bike very suitable for cycling with people who are not (any longer) able to participate in traffic independently. The Fun2Go guarantees hours of cycling fun and is used in care facilities, among other places

Benefits

- No step through, easy to take your seat
- One person steers, both can pedal
- Agile
- Stable and firm
- Comfortable adjustable seats with footrest
